

# TRANSPORT PUMP SEAL REPLACEMENT KITS

Reliable, Convenient, and Essential!

In the tanker transportation industry, pump reliability is paramount. Unibloc Hygienic Technologies understands that fleet managers prioritize lightweight, small-footprint pumps that are tough, durable, and dependable. You can trust us for our low-maintenance transport pumps, known for their long-lasting performance. To maintain this reliability, our service kits are designed to ensure pump longevity and peak performance. These kits are a smart investment for haulers and distributors, and we offer five distinct options tailored to different maintenance requirements.

## STARTUP KIT—TRIPLE (42-501-VTOLIP-KIT) PD 551 Transport Triple o-lip Seal Replacement Starter Kit

This TRIPLE o-lip seal replacement kit is an indispensable asset for any service station or distributor. The kit includes gaskets, seals, and an installation tool, eliminating the risk of seal damage during assembly. This kit is a mandatory addition to your inventory and ensures smooth operations without the hassle of unexpected downtime.
