

TRANSPORT PUMP SEAL REPLACEMENT KITS

Reliable, Convenient, and Essential!

In the tanker transportation industry, pump reliability is paramount. Unibloc® Hygienic Technologies understands that fleet managers prioritize lightweight, small-footprint pumps that are tough, durable, and dependable. You can trust us for our low-maintenance transport pumps, known for their long-lasting performance. To maintain this reliability, our service kits are designed to ensure pump longevity and peak performance. These kits are a smart investment for haulers and distributors, and we offer four distinct options tailored to different maintenance requirements.

**RELIABLE, CONVENIENT,
AND ESSENTIAL!**

(KIT NUMBER 4550) Sealing Kit 4550 bestehend aus/includes:
